GMDSS MF/HF/VHF RADIO STATION

Operating overview of GMDSS

The Global Maritime Distress and Safety System (GMDSS) is the International radio safety system for ships mandated by the International Maritime Organization (IMO). The GMDSS system provides automated distress alerting and distress communication service with location information.

Ships engaged in international shipping (SOLAS vessels) are obliged to carry GMDSS communication equipment. Also, most governments have specified use of selected GMDSS systems for their regulated domestic vessels and non-regulated vessels are permitted to use any GMDSS system.

Maintenance

Ships operating in Sea Area **A1** or **A2** must select at least one, and ships operating in Sea Area **A3** and **A4** must select at least two of the following methods of maintenance. Icom GMDSS radios offer an ideal duplication solution for replacement equipment.

- At sea maintenance
- Shore based maintenance
- Duplication of the following equipment
 - Sea Area A1 – a complete VHF radio station
 - Sea Area A2 – a complete VHF and MF radio station
 - Sea Area A3 – a complete VHF and, either MF/HF radio or INMARSAT station
 - Sea Area A4 – a complete VHF and MF/HF radio station

* In some countries, required equipment may be different. Please ask your dealer for details.

VHF MARINE TRANSCEIVER GM600

MF/HF MARINE TRANSCEIVER GM800

SURVIVAL CRAFT 2-WAY RADIO IC-GM1600E

The Latest GMDSS Functionality in a Very User-Friendly Package

Satisfies SOLAS Carriage Requirements

The GM600 and GM800 meet the GMDSS (Global Maritime Distress and Safety System) VHF and MF/HF radio requirements as required for SOLAS regulated commercial vessels engaging in international voyage. Both radios meet the MED, “wheel mark” requirements for European merchant ships.

Meets Strict Environmental Requirements

The GM600 and GM800 meet the Marine Equipment Directive on European marine equipment requirements and have passed rigorous environmental testing and quality assurance processes. These radios are designed to provide reliable operation and long-lasting durability under harsh maritime environments. In fact, the front panel of the GM600 has IPX7* protection (1 m depth of water for 30 minutes) and the rear panel has corrosion resistance coating.

* GM800: IPX7 waterproofing for controller.

The rear panel is covered with thermosetting resin coating to resist corrosion.

* Photo shows the GM600.

Meets ITU-R M.493-13 DSC

GM600

The built-in DSC provides automated distress and safety communication. The dedicated DSC receiver continuously monitors the DSC calling channel (CH 70). The DSC Multi-task mode provides straight-forward DSC operation. In this mode, the operating channel is shown at the right side of the display.

DSC Task mode screen (GM600)

GM800

The dedicated DSC watch-keeping receiver continuously scans the six distress channels in rotation. A total of 100 MMSI members for DSC calls can be stored with a 10-character ID name. The DSC Multi-task function shows up to seven DSC procedures. The GM800 is also capable of sending a distress relay call.

4.3 inch Wide Viewing Angle Colour Display

The 4.3 inch colour TFT LCD provides almost 180 degree wide viewing angle and displays high resolution characters and function icons. Even when the radio is installed to the instrument panel, the operator can clearly recognize the display information from various viewing angles. The night mode display ensures good readability in low light conditions.

Provides Loud, Clear Audio

By adopting a new waterproof paper speaker cone, the speaker provides superior sound quality and a flat frequency response with a wide frequency range. In addition, the radio delivers a powerful 10 W (GM600)* audio when connected to an external speaker.

*GM800 delivers 4 W audio.

Unified Design User Interface

The GM600 (VHF) and GM800 (MF/HF) have a unified design and offer consistent operation. A combination of the directional keypad and soft keys provides simple operation. Most used functions are assigned to soft keys (at the bottom of the display) for quick one push function access. The large ten-key pad enables you to smoothly enter channel numbers, MMSI numbers with ID names and so on.
