

MODEL NUMBER | VCV3310

VoCoVo Call Points

Designed for use with the VoCoVo Controller, the VoCoVo wireless Call Point allows customers to request assistance at the location and time it is needed. This device can be used in many different scenarios.

Touching the call button immediately generates an audible message that is sent directly to support colleagues via their VoCoVo wireless device. The message states the location where assistance is required.

Our Call Points free up your team to stay productive on the shop floor and cover desks like Click & Collect, Customer Services, and self-checkouts remotely.
