

MODEL NUMBER | VCV4110

VoCoVo Controller

The VoCoVo Controller forms the core of a scalable VoCoVo system. The VoCoVo Controller can be located anywhere on site and connects to VoCoVo Bases using an existing or a dedicated CAT5 network.

The VoCoVo Controller can integrate with existing PBX, voice gateways, or almost any VoIP telephony system to provide fully integrated telephony features alongside all the unique team communication features of VoCoVo.

The Controller also gives access to the VoCoVo Portal. The VoCoVo Portal is the secure, intuitive interface where you'll access a range of functionality, reports and features.

Key Features

- Simultaneous control of up to 1000 Wireless devices (subject to infrastructure)
- Facility to easily add and remove devices
- WAN & LAN ports for onsite and offsite integration
- Network integration IEEE802.3 (3 NICS)
- Event logs are generated to provide data on activity for each Input device allowing analysis of system usage.
- 4G/5G data connectivity (additional device required)
- Integration with devices such as Fire/Security Alarm Systems, Radio Paging, PMR Radio, Smart Phones.
- Custom applications and back-office integrations
- Integrated data visualisation through VoCoVo portal
- Messages, Firmware and Configuration easily upgraded through remote administration.

Product Specification

Dimensions (mm)	468W x 45H x 230D
Weight	980g
Input Voltage	Mains 240V
Energy Usage	5.4W (per unit)
